## O'Neal Steel Acquires TW Metals

BIRMINGHAM, AL—O'Neal Steel, Inc. has acquired the stock of TW Metals from Superior Group, a private holding company headquartered in Radnor, PA, for an undisclosed amount. The transaction marks O'Neal's fourth acquisition since 1997, and with the addition of TW Metals, brings the company's total to over 60 stocking locations. TW will operate as a wholly-owned subsidiary of O'Neal Steel.

“We acquired TW for its rich history, outstanding people, leading position in specialty metals, longstanding customer and supplier relationships, and large distribution network,” said Craft O'Neal, chairman of O'Neal Steel. “TW further diversifies and expands our product offerings, enabling O'Neal to broaden our customer base and improve service to existing accounts.”

TW Metals stocks and processes pipe, tube, bar, rod, sheet, and plate in stainless, aluminum, alloy and carbon, as well as a variety of high alloys, such as nickel and titanium from 17 U.S. and three European facilities in the UK, Poland and France.

O'Neal Steel, headquartered in Birmingham, AL, is the largest family-owned, full-line metals service center in the United States. O'Neal's family of companies also includes Metalwest, a light gauge flat rolled service center headquartered in Brighton, CO; Aerodyne Alloys, a service center specializing in aircraft nickel, cobalt and titanium based alloys headquartered in Windsor, CT; and Leeco Steel, a service center headquartered in Chicago specializing in abrasion resistant, extra high-strength steel.
